

CCP side sealing packing machine

[Technical Parameters]

model name	CCP-CF250	CCP-ZZ250
machine size(mm)	2600X1300X1550 mm	2600X1250X1600
max packing size	Random(L)x400(W)x250(H)	Random(L)x400(W)x250(H)
packing speed	1-40	1-60
temperature	0-260	
power(kw)	3	
power supply	1PH 220V 50HZ	
air (kg/c m ²)	6-8	
film	POF	
weight (kg)	800	
optional	Shrink tunnel series: CCP-R1000-3000	

[Features]

CCP-CF250 is used for automatic packaging of products, using electric eye sensor for automatic packaging, High work efficiency. Suitable for packaging of all kinds of different size and shape of the product.

1. CCP-CF250 is suitable for any products, such as, POF, PE, BOPP environmental shrinkable packaging materials such as plastic;
2. Sealing knife used in Taiwan anti-stick coating Teflon high temperature steel ,sealing will not crack ,not coke , any smoke pollution;
3. Electric eye automatic control device, do the vertical and horizontal selection, could according goods size and thickness determined;
4. It can be with my company CCP-R1000 `3000 shrink machine, to achieve a more perfect effect.

[Application]

Widely used in aluminum, plumbing, printing, photo frames, electronic, cosmetic, food other industries suitable for mass production, especially for long objects packaging.
